Valsts reģionālās attīstības aģentūra
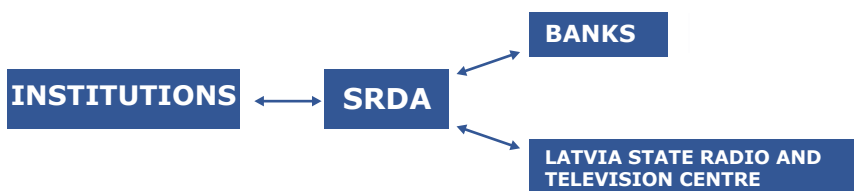

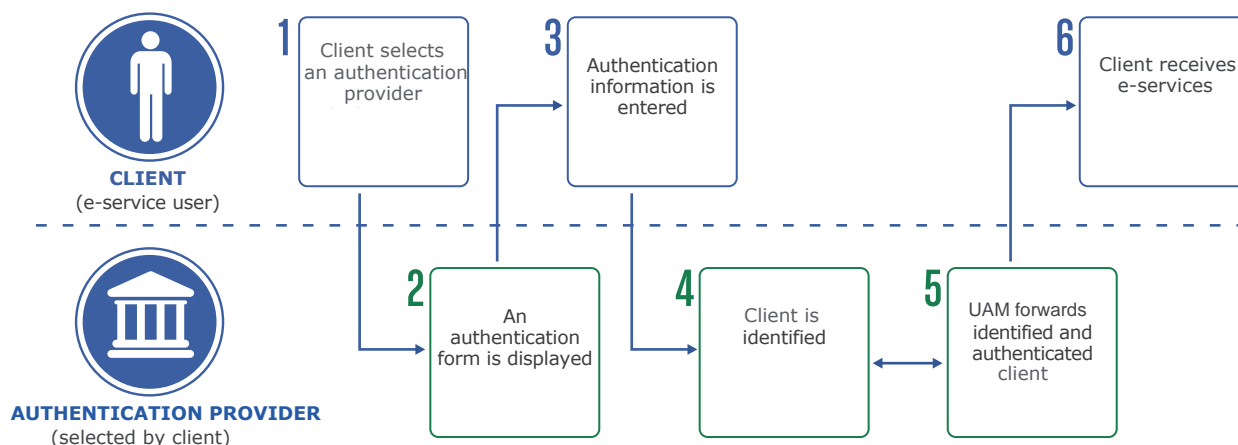

UNIFIED AUTHENTICATION MODULE

UNIFIED AUTHENTICATION MODULE (UAM) ALLOWS USERS TO AUTHENTICATE THEMSELVES USING VARIOUS AUTHENTICATION PROVIDERS

BANKS

INSTITUTIONS ← → **SRDA**

LATVIA STATE RADIO AND TELEVISION CENTRE

HOW DOES AUTHENTICATION WORK?

CLIENT
(e-service user)

1 Client selects an authentication provider

3 Authentication information is entered

6 Client receives e-services

AUTHENTICATION PROVIDER
(selected by client)

2 An authentication form is displayed

4 Client is identified

5 UAM forwards identified and authenticated client

ADVANTAGES OF UAM

Convenient and secure user authentication:
◇ on Latvija.lv
◇ on other institutions' portals
There is no need for institutions to create new solutions and make cooperation agreements with other service providers.
Two types of identification are available:
◇ with an eID card and e-signature
◇ via the Internet banking system (currently available 10 Internet banking systems)
Single sign-on – one-time authentication allows accessing all portals at the same time.

Currently authentication can be carried out by natural persons and legal entities.

SIGNATORIES

AUTHORISED PERSONS

HEADS OF INSTITUTIONS

It is planned to develop cross-border authentication as well (eIDAS).
